

Mullet MadJack: Classic anime action FPS

With a release date set for 2024 on Steam, the game that draws inspiration from the golden age of anime is filled with action and speed

06/15/2023 - Hammer95 Studios is about to release their latest game, titled Mullet MadJack, on the Steam platform. This first-person shooter game merge elements of classic anime with intense action, paying homage to the nostalgic era of VHS.

Check out the gameplay [here](#):

1 MULLET COP, 60 FLOORS OF HELL.

In an exciting journey inspired by classic anime, you will be immersed in the cyberpunk world of Mullet MadJack, set in the 90's... 2090 to be precise. Your mission is to rescue the world's most famous influencer from the clutches of a dangerous criminal organization comprised of powerful billionaire robots.

In a future where vigilantes are dependent on dopamine to survive, you will be faced with deadly challenges as you navigate a skyscraper, all in pursuit of securing your next dose!

As you progress through the building's floors, a crowd hungry for action follows your every move through live streaming broadcasts. This public exposure creates additional tension, increasing the pressure on you and the need to achieve increasingly more impressive feats. Your battle is not only for the liberation of the kidnapped influencer, but also for the preservation of your own reputation and the entertainment of those who are watching.

Get ready for a journey filled with dangers, thrilling challenges, and the aesthetics of the golden age of anime.

"We love the golden age of Japanese anime from the 80s and 90s, and we want to pay tribute to that magical era with this game." says Alessandro Martinello.

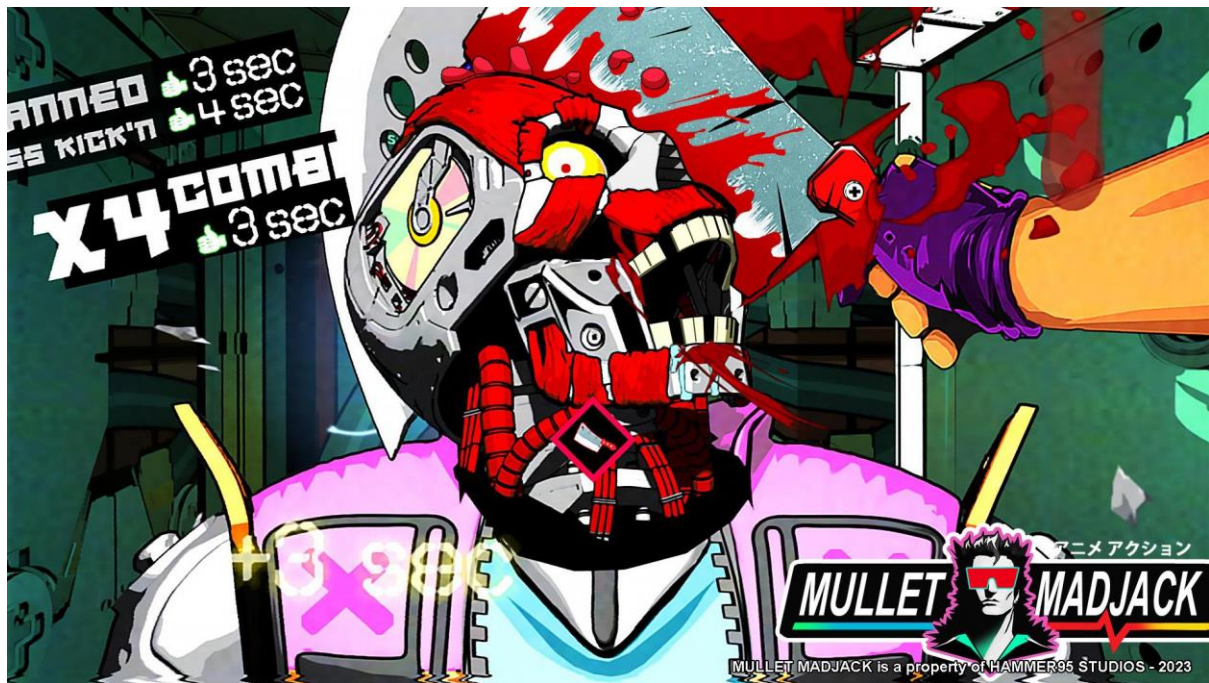

What makes Mullet MadJack unique:

Exciting and dynamic combat: Clear the floors filled with robots, and in crucial moments, execute ultraviolent finishers on your enemies to survive.

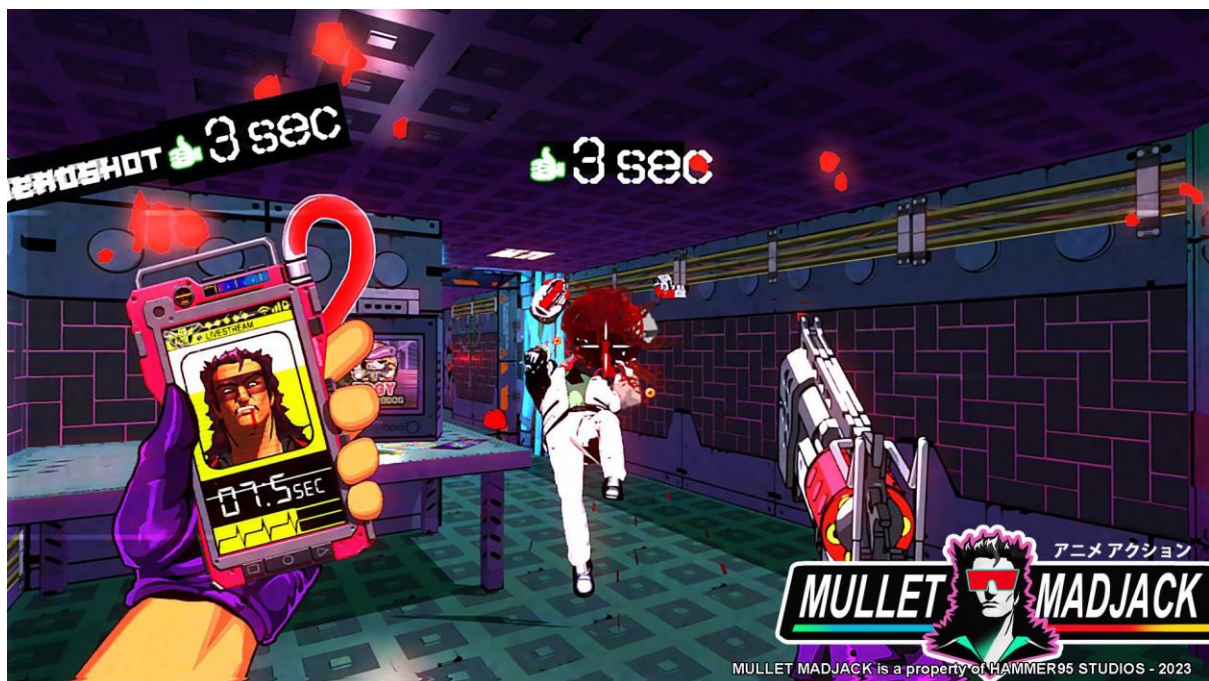

Campaign mode: Race against time and infiltrate a building alone, overcoming each floor until you reach your objective.

Survival mode: Utilize your skills in an endless arcade mode and outlast your friends.

Unique visual and art style: The contrasting colors between black and vibrant hues evoke the aesthetic of violent and mature anime from the VHS era.

Nostalgic soundtrack: Inspired by the synthwave genre, the soundtrack sets the tone and urban atmosphere of the game.

Character progression: Enhance your character with smart choices, so you can reach the last floor in the best possible time or else you'll have to try again. But remember, each upgrade will affect the way the game is played.

Technical details:

Release date: 2024

Languages: English and Japanese

Mullet MadJack is a highly fast-paced first-person action-adventure game designed for single-player. It draws inspiration from the Badass Old-School classic anime of the 80s and 90s, featuring a retro aesthetic and immersive gameplay that transports players back to the nostalgic era.

The game features vibrant colors, memorable characters, and a unique story, providing an authentic experience for both gaming enthusiasts and anime fans alike.

About Hammer95 Studios

Hammer95 is a collective of 3 devs who love the aesthetic of old anime and aim to bring back that nostalgia!

With a planned release on **Steam starting from 2024**, the developer states that the game will soon be available for PS5, Xbox, and Switch as well. Testing for the Steam Deck version is already underway.

In 2024, the game will offer an action-packed FPS with Rogue-Lite elements and fully animated anime cutscenes, further enhancing the experience of an Old School action anime.
